

Performer III

 **a dec**[®]
reliablecreativesolutions™

Access *and* comfort. All within reach.

Designed to give you flexibility, access and comfort, Performer answers the need for less complexity, lower cost, and exceptional choices for every dollar you invest.

Quiet, smooth, dependable

The chair's thin-profile upholstery allows you to lower the patient to get in close for a comfortable working position. For treating smaller patients and working direct, you can choose Performer's narrow backrest, which gives you exceptional access around the patient's neck and shoulders.

Because patient comfort is just as important as yours, the backrest, seat, and toeboard are designed to cradle the patient and reduce pressure points. For a narrow backrest, there's also the "arm slings" option to accommodate all kinds of body types.

Contoured backrest

Delivery System

Among Performer's distinctive choices is a front- or back-mounting location for the delivery system. The front-mounting location offers more flexibility and provides better ergonomics for those who prefer side delivery and working indirect. The back-mounting location is a good choice if you prefer working direct or need to provide stand-up dentistry.

Assistant's Instrumentation

Performer offers two basic vacuum models: cuspidor with assistant's instrumentation and assistant's instrumentation-only. Both models come standard with a unitized four-position holder, autoclavable saliva ejector, and autoclavable HVE. A syringe can be added as an option.

Performer's extended assistant's arm option, which rotates on the other side of the chair, adds flexibility and provides the solo operator (or assistant) with better access to assistant's instrumentation.

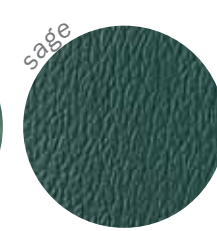

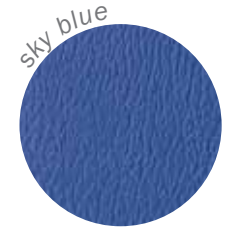

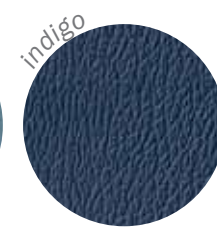

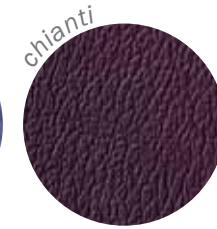

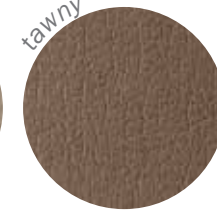

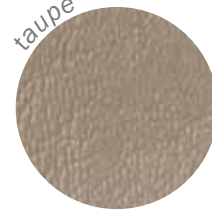

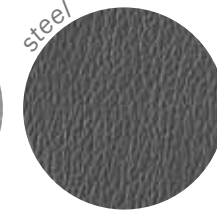

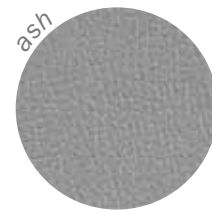

Upholstery Choices

Choose from two different backrest options, both about two inches (51 mm) thick to maximize operator access. The contoured backrest provides excellent comfort with a wider shape to support a variety of shoulder widths. The narrow backrest is a good choice for pediatric and smaller-framed patients.

Lights

Performer's dental light mounts to a fixed post on the chair and provides both horizontal and vertical adjustment. Choose from the standard Performer halogen 2-axis light or go with the halogen 3-axis A-dec 6300 Light.

Chair-mounted Accessory Tray

Performer's unique accessory tray mounts on either side of the chair and rotates for chair-side or trans-thorax positioning. Capable of supporting up to 12 lbs (15.4 kg), this convenient tray can hold instruments, serve as a periodontal charting surface, or support accessories such as a tabletop scaler.

Specifications
